PROFESSIONAL SUMMARY

Results-driven Java Full Stack Developer with 3.5+ years of experience building and shipping enterprise-grade web applications end-to-end, from API design through production deployment. Deep hands-on expertise across the Spring ecosystem (Spring Boot 3.x, Spring Security, Spring Data JPA, Hibernate) paired with React.js on the frontend, delivering secure, scalable systems used in production. Track record of reducing defects, improving performance, and taking ownership of features within fast-paced Agile Scrum teams. Strong fundamentals in secure authentication (JWT), RESTful API architecture, and automated testing (JUnit, Mockito).

TECHNICAL SKILLS

Core Java & OOP: Core Java, Java 8, Java 17, Object-Oriented Programming, Java Design Patterns, Data Structures & Algorithms

Frameworks: Spring Boot 3.x, Spring MVC, Spring Security, Spring Data JPA, Hibernate, JWT Authentication

Web Technologies: JavaScript (ES6+), React.js, HTML5, CSS3, Responsive Web Design

APIs & Architecture: REST APIs, HTTP/HTTPS, Client-Server Architecture, Microservices, SDLC

Database: SQL, MySQL, Database Design, Query Optimization, Transaction Management, Indexing

Security: Secure Coding Practices, Encryption Basics, Role-Based Authorization, OWASP Fundamentals

Testing: JUnit, Mockito, Unit Testing, Integration Testing, System Testing, Test-Driven Development

Tools & Practices: Git, GitHub, Maven, Postman, Agile (Scrum), CI/CD, Code Reviews, Debugging

AI-Assisted Development: GitHub Copilot, Claude, Gemini, ChatGPT

Familiar With: Docker, Jenkins, Kubernetes Basics, AWS Fundamentals

PROFESSIONAL EXPERIENCE

SPH Data Pvt. Ltd. | Mar 2025 – Jun 2026

Software Developer | Java 17, Spring Boot 3.x, Spring Security, React.js, MySQL

- Owned end-to-end delivery of a core transaction-processing module, from design through production deployment, within Agile Scrum sprint cycles.
- Cut production defects by 20% by architecting RESTful APIs with centralized exception handling, request validation, and standardized response contracts.
- Secured sensitive customer data across 3+ modules by implementing JWT-based authentication and role-based authorization with Spring Security.
- Improved frontend responsiveness by 15% through tightly integrated React.js components communicating with Spring Boot backend services.
- Drove code quality through JUnit/Mockito test suites reaching 80% coverage, catching regressions before release.
- Partnered with cross-functional Agile Scrum teams on sprint planning, code reviews, and deployments to ship features on schedule.

AVA Consultancy Services LLP | Jan 2023 – Feb 2025

Associate Software Developer | Java 8, Spring Boot, Spring Data JPA, Hibernate, React.js, MySQL

- Built backend modules supporting 1,000+ concurrent users/transactions using Core Java, Spring Boot, Spring Data JPA, and Hibernate.
- Accelerated feature delivery by 18% by building reusable React.js components integrated with RESTful APIs.
- Reduced query execution time by 25% through SQL optimization and database handling improvements in MySQL.
- Implemented CRUD operations, business logic, input validation, and exception handling across 3+ application modules.
- Resolved 20+ post-release production issues through hands-on system testing and debugging, minimizing downtime.
- Delivered consistently on sprint commitments within Agile Scrum teams across the product lifecycle.

PROJECTS

Retail Banking Account Management System

Tech Stack: Core Java 17, Spring Boot 3.x, Spring Security, JWT, React.js, Hibernate, MySQL

- Built a secure banking platform enabling account management, fund transfers, balance checks, and transaction history through a responsive client-server interface.
- Designed RESTful APIs for customer registration, account management, balance inquiry, and transaction processing.
- Secured user data with JWT-based authentication and role-based authorization via Spring Security.
- Modeled relational database schemas with Spring Data JPA and Hibernate for reliable data persistence.
- Followed Controller-Service-Repository architecture for clean separation of concerns and RESTful design consistency.
- Validated functionality through Unit and Integration Testing using Postman and JUnit within an Agile Scrum workflow.

EDUCATION

Dr. A. P. J. Abdul Kalam Technical University | 2019 – 2023

Bachelor of Technology (B.Tech), Computer Science & Engineering | CGPA: 7.9/10
