

DEENADHAYALAN S

ASSOCIATE TEST ENGINEER

PROFILE

Possess 3+ years of hands-on experience in software testing. I have a proven track record of effectively testing diverse development projects. I focus on testing based on customer requirements, ensuring the deliverables meet their expected targets. I possess demonstrated expertise in cutting-edge software development and testing techniques, which have equipped me with the necessary skills for success in this field.

CAREER SUMMARY

- An experienced Functional and Automation Tester with 3+ years of experience.
- Preparing test scenarios, test cases, and test data.
- Developing tests using Cucumber with integration of J-Unit, including feature files and step definitions.
- Creating highly efficient and maintainable Java code for Page Object Models.
- Expertise in reviewing and analyzing user stories, product backlog, and use case documents.
- Using Maven to build and run the Selenium automation framework.
- Developing SQL queries for database testing and backend process validation.
- Active participation in Agile ceremonies like sprint planning, daily Scrum meetings, sprint reviews, and retrospectives.
- Worked on bug tracking and preparing bug reports using JIRA.
- Conducting both functional and non-functional tests to ensure successful implementation and integration of changes into production.
- Developing and executing test cases for API testing and testing RESTful web services using Postman.
